LastMile DELIVERY

Training for Last Mile Deliverers/Drivers in Safe and Sustainable Urban Areas (TRALMEDES)

Start: 01-09-2020 - End: 31-08-2022

Project Reference: 2020-1-ES01-KA202-083161

trainingforlastmile.eu

ABOUT THE PROJECT

Last Mile ecosystem is facing challenges driven by the **increase in the use of new mobile-based trading technologies and the e-commerce**, the increasing consciousness in sustainability and safety in urban areas. All these challenges are causing a **high speed evolution and adaptation of the logistics sector** to the demands of the cities of the future. No training model focused especially on those responsible for this type of transport is already developed.

The European project '**Training for Last Mile Deliverers/Drivers in Safe and Sustainable Urban Areas (TRALMEDES)**' arises from this need of the logistics sector to **promote road safety awareness, sustainability and adapted training** to the growth experienced by the Last Mile Delivery in these recent years.

The project will work on developing a proposal for **road and mobility awareness and training programs** based on the implementation of new technologies to increase and **improve the driving skills of delivery drivers, promote sustainable mobility and reduce road accidents**.

OBJECTIVE

The objective of the project is to develop an **open and innovative online e-learning material and platform** for delivery drivers, trainers and companies (freight forwarders, courier companies, independent drivers and couriers, click and collect retailers, self-service parcel lockers and postal service destination centers) involved in the last mile delivery sector, enabling them to perform their work with **specific skills for last mile delivery ensuring safer and more sustainable cities**.

INTELLECTUAL
OUTPUTS

- 1. Competence Map as such:**
Identification of the profile of the last mile deliverer/driver, useful applications and technologies, basis for the project studies and expected results.
- 2. Training course and platform Methodology and Transferability Guide:**
Training tools which can be used daily by deliverers/drivers making learning independent of time and place.
- 3. Recommendation Set:**
Directly address to public bodies on how to improve regulation on the sector of last mile delivery.
